DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 11-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Hsieh (USPN 6,245,614).

Hsieh discloses the claimed EEPROM device (Fig. 17) comprising a silicon substrate 102 having a source/drain region (132 or 134); a tunnel oxide layer (104, 105) disposed over the silicon substrate; a select gate (112, 114, 116, 118) disposed over the tunnel oxide layer, wherein the select gate is defined by conductive layer 106 covered with a first insulated material 108 thereon and comprises a sidewall 122 made of a second insulated material; a sidewall forming a floating gate 126 aligned to one side of the select gate; a third insulated material 142 disposed over the tunnel oxide layer, the select gate and the floating gate; and a control gate 145 formed on the third insulated material.

Regarding claim 12, each of the first insulated material, the second insulated material and the third insulated material is one selected from a group consisting of silicon oxide, silicon nitride and silicon oxide/nitride composite.

Art Unit: 2811

Regarding claim 13, the conductive layer 106 is made of polysilicon.

Regarding claim 14, the floating gate and the control gate are made of polysilicon.

Regarding claim 15, the control gate 145 partially covers the third insulating material 142.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thien Tran whose telephone number is (703) 308-4108. The examiner can normally be reached on 8:30AM - 5:00PM Monday through Friday.
